Shareware Software for the IBM PC and compatibles

Romancing the Rose

PAGANITZU

Journey into an Aztec pyramid and survive the adventure of a lifetime! No other game forces you to die to complete it! That's just one of many incredible plot twists in this excellent puzzle-oriented arcade adventure game.

In this episode your character, Alabama Smith, discovers that the ancient Aztec pyramid, known as Paganitzu holds many dark secrets. Al inadvertently releases a spirit of immense power, whose desire is to ravage the world!

Paganitzu is an innovative arcade game. It tests your mind more than your finger speed.

Installation onto your hard disk is easy with our special startup program.

About Shareware:

This product is shareware. With shareware products you can actually try the software before you buy it. The author of this program has given us permission to package this complete game for you to try on your own computer. The price you pay for this package covers the production and distribution costs but does not include payment to the authors. If this program meets your needs and you continue to use it then registration is required. Registration, which can be handled locally by Manaccom will give you hints and additional games in the series.

Requirements:

Both CGA and EGA/VGA versions included, hard disk. Optional joystick.
